SARASOTA, FL

BATTERY REPLACEMENT GUIDE

REPLACING YOUR GOLF CART BATTERIES?

KNOW YOUR OPTIONS BEFORE YOU BUY

Honest prices on both choices, what you get with each, and what they really cost over the life of your cart.

OPTION A

NEW LEAD-ACID SET

STARTING AT

$1,295*

Installed

The familiar choice. Lasts a few years, needs regular watering and upkeep.

BEST LONG-TERM VALUE

OPTION B

LITHIUM UPGRADE

STARTING AT

$1,995*

Installed

More range, zero maintenance, faster charging, and you may never buy batteries again.

LITHIUM IS OFTEN JUST A FEW HUNDRED MORE

Lead-acid usually needs replacing every few years. Lithium lasts far longer, so it often costs less over the life of your cart. See page 4.

- ✓ Exact price before any work
- ✓ Local Sarasota shop
- ✓ We install either option

OPTION A

A NEW LEAD-ACID SET

The same type of batteries most carts come with. A solid choice if you're selling the cart soon or rarely drive it.

STANDARD SET

STARTING AT

$1,295

Installed

Quality deep-cycle batteries at a budget-friendly price.

PREMIUM SET

STARTING AT

$1,595

Installed

Top name-brand batteries built for longer life.

EVERY LEAD-ACID REPLACEMENT INCLUDES

- ✓ A full new set matched to your cart
- ✓ Old batteries taken as cores
- ✓ Professional installation
- ✓ Charge and connection check

WHAT TO EXPECT WITH LEAD-ACID

- **Lasts a few years.** Most lead-acid sets need replacing every 4 to 6 years, sooner with heavy use.
- **Regular upkeep.** Check water levels monthly with distilled water and clean the terminals a couple of times a year.
- **Florida heat is tough on it.** Battery maker Trojan notes lead-acid life drops sharply as temperatures climb past 77°F.
- **Needs charging in storage.** If the cart sits for months, it should be charged every few weeks or the batteries can be damaged.

Price depends on your cart's battery setup (for example four 12V, six 8V or eight 6V batteries) and the brand you choose. Terms and conditions apply.

OPTION B

UPGRADE TO LITHIUM

One sealed pack replaces your whole bank of lead-acid batteries. The upgrade most owners wish they'd made sooner.

STARTER
STARTING AT
$1,995
Entry-size pack for everyday neighborhood driving.

PLUS · MOST POPULAR
STARTING AT
$2,595
105Ah name-brand pack with plenty of range for long days.

MAX
STARTING AT
$2,995
160Ah long-range pack for lifted, 6-seat and heavy-use carts.

All installed. Every package includes the lithium pack, a lithium charger, a charge meter, and install and testing.

WHAT YOU GET WITH LITHIUM

- **More range.** Go farther on every charge.
- **Fast charging.** A fraction of the time, top off anytime.
- **Lasts far longer.** Many years of service from one pack.
- **Steady power.** Full pep until it's nearly empty.
- **Zero maintenance.** No watering or terminal cleaning, ever.
- **Built for Florida.** Sealed against our heat and humidity.
- **Perfect for snowbirds.** Holds its charge far better in storage.
- **Lighter cart.** Quicker, with less wear on tires and brakes.

THE REAL COST

CHEAPER TODAY ISN'T CHEAPER OVER TIME

Lead-acid sets typically last 4 to 6 years. Lithium packs typically last 8 to 12. Here's what that looks like over about 10 years of owning your cart.

BATTERY COST OVER ABOUT 10 YEARS

Example using our starting prices and typical battery life. Lead-acid totals don't include distilled water, terminal cleaning or early replacements. Your results will vary with use and care.

	LEAD-ACID	LITHIUM
Typical life	4 to 6 years	**8 to 12 years**
Upkeep	Monthly watering	**None**
Charging	Slow	**A fraction of the time**
Florida heat	Shortens its life	**Sealed and protected**
Storage	Needs charging every few weeks	**Holds its charge far better**

WHICH IS RIGHT FOR YOU?

YOUR CART, YOUR CALL

We'll gladly install either one. Here's a quick way to decide.

GO LITHIUM IF YOU...

- ✓ Drive your cart a few times a week or more
- ✓ Plan to keep your cart for years
- ✓ Leave your cart parked for months at a time
- ✓ Are tired of watering batteries
- ✓ Want more range and faster charging

LEAD-ACID MAY FIT IF YOU...

- ✓ Plan to sell the cart soon
- ✓ Only drive it once in a while
- ✓ Need the lowest price today
- ✓ Don't mind regular upkeep

HOW IT WORKS

1

CALL OR TEXT

Send your cart's make, model and a photo of the batteries.

2

GET BOTH PRICES

We'll quote lead-acid and lithium so you can compare.

3

DROP IT OFF

Bring it to our Sarasota shop, or schedule a pickup.

4

RIDE AGAIN

We install and test everything, then you're back on the road.

NOT SURE? JUST ASK.

We'll give you straight answers and an exact price on both options. No pressure.
