MOBILE GOLF CART SERVICE
SARASOTA, FL

LITHIUM INFO PACKET

REPLACING YOUR BATTERIES? READ THIS FIRST.

UPGRADE YOUR GOLF CART TO LITHIUM

Go farther, charge faster, and never water a battery again. Built for Florida.

CONVERSIONS STARTING AT

$1,995* Installed

Often just a few hundred dollars more than a new set of lead-acid batteries.

MORE RANGE

Go farther on every single charge.

ZERO MAINTENANCE

No watering, no acid, no corroded terminals.

FAST CHARGING

A fraction of the time. Top off anytime.

BUILT FOR FLORIDA

Sealed against our heat and humidity.

PAYS FOR ITSELF

Stop buying a new lead-acid pack every few years. Lithium usually costs less over the life of your cart.

PERFECT FOR SNOWBIRDS

Lead-acid drains and dies while your cart sits for months. Lithium holds its charge far better.

- ✓ Exact price before any work
- ✓ Local Sarasota shop
- ✓ Pickup and delivery available

10 REASONS TO GO LITHIUM

Once you drive a lithium cart, you'll never want to go back.

01 MORE RANGE
Go farther on every charge, and pick the pack size that fits how you drive.

02 ZERO MAINTENANCE
No watering, no checking levels, no scrubbing corroded terminals. Ever.

03 FAST CHARGING
Charges in a fraction of the time, and a quick top-off before you head out won't hurt it.

04 BUILT FOR FLORIDA
A sealed pack built to handle our heat and humidity, with no exposed terminals to corrode.

05 PAYS FOR ITSELF
Stop buying a new lead-acid pack every few years. Lithium usually costs less over the life of your cart.

06 SNOWBIRD-PROOF STORAGE
Lithium holds its charge far better while you're away, so your cart is ready when you're back.

07 STEADY POWER
No more sluggish rides on hills and bridges as the battery drains. Full pep until it's nearly empty.

08 LIGHTER, QUICKER CART
Shed the heavy battery bank for snappier acceleration and less wear on tires, brakes and lawns.

09 NO ACID, NO MESS
No spills, no fumes, and no corroded battery tray in your garage.

10 HIGHER RESALE VALUE
A cart with a lithium pack is an easier sell when it's time to upgrade.

ALL OF THIS, STARTING AT $1,995 INSTALLED

LEAD-ACID VS LITHIUM

LEAD-ACID WEARS OUT. LITHIUM KEEPS GOING.

Most carts still run on a bank of heavy lead-acid batteries. One sealed lithium pack replaces all of them. Here's how they stack up.

	LEAD-ACID	LITHIUM
Range	Shrinks as batteries age	**More miles, sized to how you drive**
Upkeep	Regular watering and terminal cleaning	**None**
Charging	Slow, and partial charges wear it down	**A fraction of the time, top off anytime**
Florida humidity	Exposed terminals corrode	**Sealed pack, nothing to corrode**
Storage	Slowly drains and can die while parked	**Holds its charge far better**
Power	Fades as the batteries drain	**Steady until it's nearly empty**
Weight	A heavy bank of several batteries	**One much lighter pack**
Lifespan	Replaced every few years	**Many years of service**

THE BOTTOM LINE

Lead-acid costs less on day one. But once you add up the replacement packs, the upkeep and the hassle, lithium usually comes out ahead over the life of your cart.

PRICING

PICK YOUR POWER

Three simple packages, all installed at our Sarasota shop. You'll get your exact price in writing before any work begins.

STARTER

STARTING AT

$1,995

MAX

STARTING AT

$2,995

Installed

160Ah long-range pack

Extra range for big days, lifted and 6-seat carts, and heavy use.

EVERY PACKAGE INCLUDES

- ✓ Sealed lithium battery pack
- ✓ Battery charge meter
- ✓ Lithium charger
- ✓ Professional install and testing

WHAT CAN CHANGE YOUR PRICE

Your cart: make, model, year and voltage decide which kit fits.

Cart condition: if anything else needs fixing first, we'll tell you up front.

Accessories: lights, stereos and other add-ons may need extra wiring.

Pickup and delivery: available. Just ask and we'll add it to your quote.

Prices shown are starting prices for a standard conversion. Final price depends on your cart and the battery you choose. Terms and conditions apply.

HOW IT WORKS

1

CALL OR TEXT US

Share your cart's make, model and year, and how you use it.

2

GET YOUR QUOTE

Our service partner calls you with an exact price. No pressure.

3

DROP IT OFF

Bring your cart to our Sarasota shop, or schedule a pickup.

4

RIDE LITHIUM

We install and test everything, then you're back on the road.

QUESTIONS WE HEAR A LOT

Can my cart be converted?
Most electric golf carts can. We'll confirm the right kit for your exact cart when we quote it.

How long will my cart be gone?
The install itself is quick. We'll give you a timeline with your quote based on your cart and parts.

Is it really worth it?
If you'd otherwise keep buying lead-acid packs every few years, lithium usually comes out ahead over the life of the cart.

Can I keep my old charger?
You won't need it. Lithium needs its own charger, so every package includes one made for your new pack.

Do you come to me?
Conversions are done at our Sarasota shop for the best result. Pickup and delivery are available.

Will I know the price before you start?
Always. You'll get your exact price before any work begins.
